At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. For further guides, hints and tips, please visit nationalcollege.com.

What Parents & Educators Need to Know about

ADVERTISEMENTS AIMED AT CHILDREN

WHAT ARE THE RISKS?

Children are particularly vulnerable to the persuasive effects of advertising because of their still-developing critical thinking and impulse control skills. Children are regularly and passively exposed to advertising online, whether through influencers, paid advertisements, or sponsored content. Although 92% of 12–17-year-olds felt confident recognising online advertising, only 37% correctly identified sponsored adverts in search results.

INFLUENCER MARKETING

Influencers are an increasingly prominent part of children's online experiences, with four in ten 3–17 year olds who watch online videos reporting that they watch influencer content as entertainment. Influencers can appear credible, relatable, trustworthy and aspirational. Although seven in ten 12–17 year olds recognised a paid partnership, some believed products were promoted because influencers liked or thought they were 'cool'.

PARENTAL PRESSURE TO PURCHASE

Children's exposure to online advertising can pressure parents to buy products they see advertised. When told no, children may feel upset, treated unfairly or left out when comparing themselves with peers. With children potentially seeing up to 40,000 adverts a year, parents cannot meet every request. This can lead to arguments and put strain on family relationships.

UNREALISTIC EXPECTATIONS

Advertising often focuses on the positive effects of a product, which can create unrealistic expectations among young people. Children may be particularly susceptible to these claims when they do not recognise the persuasive intent behind them. They may be more likely to believe that a cream will 'transform' their skin, clothing will help them fit in, or protein powders will quickly build muscle. Repeated exposure to adverts such as beauty content can normalise unrealistic expectations and create material dissatisfaction or body image concerns.

HARMFUL ADVERTISING

Children can encounter online advertising through games, videos, social media and links, meaning they may see content that is inappropriate for their age. This can include products or messages that influence attitudes towards body image, health or behaviours such as gambling. Repeated exposure to beauty content can normalise adult-oriented beauty routines and psychological pressure.

UNINTENDED PURCHASES

Online advertising can encourage young people to make purchases. Ofcom found that 58% of 8–17 year olds had spent money online, with 27% saying adverts encouraged them to spend and 22% influenced by influencer content. Despite this, a third of the children regretted an in-game purchase, while almost half said they were unclear about what they were buying. This can lead to children spending more than intended or making purchases without fully understanding the cost or product, adding pressure on parents to spend.

LACK OF ADVERTISING TRANSPARENCY

Advertising is not always obvious to children, particularly when influencers promote brands, products or services without clearly stating that it is an advert, or when advertising is embedded within entertaining content and uses positive language. Children may not realise that the adverts are promoting something, making the recommendation seem more trustworthy and more influential.

Advice for Parents & Educators

TEACH CHILDREN HOW TO SPOT ADS

Help children to recognise when content is trying to sell them something. Teach them to look for signs such as '#ad', 'sponsored', 'paid partnership' as well as promo codes or product links attached. Explain to your child that these adverts can be embedded within videos, social media posts, games or influencer posts and are not always obvious to identify. Helping children recognise these advertisements can make them less likely to be influenced by them.

ENSURE PAYMENT DETAILS ARE LOCKED DOWN

Avoid saving your bank card details on children's devices, games or apps wherever possible. This can help reduce the risk of children making accidental or impulsive purchases following seeing an advert. Check the purchasing settings on games and social media accounts and use parental controls or purchase approval settings where possible. Talk to your child about the importance of asking before making a purchase online.

DEVELOP CRITICAL THINKING SKILLS

It is important to encourage children to question what they see online rather than automatically believing it. Encourage them to stop and think before clicking. Have them ask themselves, 'Why am I seeing this?' and 'What are they trying to get me to want/buy?'. Remind them that adverts and influencers only highlight the positive aspects of a product. By developing these skills, children will begin to recognise, question, and respond to manipulative marketing practices.

ENCOURAGE OPEN COMMUNICATION

While it is important to set age restrictions on games and social media, inappropriate adverts can still slip through. Talk regularly with your child about adverts or influencer content they see online. Open communication makes it easier for your child to come to you if they have any questions about products or inappropriate content. It also helps you understand what your child is being exposed to online and where they may need support.

Meet Our Expert

Dr. Claire Sutherland is an education consultant and digital safety expert, with a background in primary teaching. She combines her PhD research in cyberbullying with hands-on experience, delivering impactful digital wellbeing workshops and policies for schools across Australia and now in the UK.
